None

Description:

Economic theory provides a framework for understanding the behavior of individuals and firms. This course involves the study of the microeconomic theory of the individual and the firm. The course covers the theory of the individual and the firm, and the theory of the market. The course is designed to provide students with a solid understanding of the basic principles of microeconomics. The course is designed to provide students with a solid understanding of the basic principles of microeconomics. The course is designed to provide students with a solid understanding of the basic principles of microeconomics.

- Students will master equilibrium analysis which involves aggregating over the choices of individuals and
