Course Outline:

This course surveys the ideas, controversies, and techniques that constitute modern macroeconomics. The principal issues it covers lie at the heart of such important social problems as unemployment, inflation, deficits and debts, and economic growth. Moreover, the empirical study of many issues raised in theoretical and political debates is emphasized. See the reading list for topics and readings.

Grade Determination and Final Examination Details:

There will be two midterms and a final exam. The weights of these in the course grade are as follows:

	<u>Weight</u>
Midterm Test #1	25%
Midterm Test #2	25%
Final Examination	50%

The two-hour final examination will be scheduled by the instructor and held in the classroom during the final examination period.

Tests and final exams are marked on a numerical (percentage) basis, and then converted to letter grades. The course grade is then calculated using the weights indicated above. As a guide to determining standing, these letter grade equivalences will generally apply:

A+	96 ? 100	B	76 ? 80	C-	59 ? 62
A	89 ? 95	B-	72 ? 75	D+	55 ? 58
A-	85 ? 88	C+	68 ? 71	D	50 ? 54

B+ 81 - 84 C 63 - 67 F 0 - 49

Part marks of 0.5 or above will be rounded up; those below 0.5 will be rounded down.

If, for some reason, the distribution of grades determined using the aforementioned conversion chart appears to be abnormal the instructor reserves the right to change the grade conversion chart if the instructor, *at the instructor's discretion*, feels it is necessary to more fairly represent student achievement.

Non-programmable calculators will be allowed during the writing of tests or final examinations.

Tests and exams will not involve multiple choice questions.
