Course Description:

This is a course about markets: how they function and why they can “fail”. We will begin with a rigorous review of the fundamentals of the theory of the consumer, the neoclassical producer theory and the theory of the firm. We will then discuss how imperfect information affects transactions within and between firms. The course is intended to lay the foundation for graduate work in economics. As such it will be taught at a high level and with mathematical rigor, and students will collaborate to develop their own theoretical contributions. You are expected to be familiar with the mathematical concepts covered in ECON 387/389. A detailed outline will be provided on the first day of class.
